

JOIN THE TEJON RANCH CONSERVANCY!

Be part of something big! At 240,000 acres the Tejon Ranch Conservancy is caring for the biggest and oldest working ranch in California. But, we are more than just acres; we are research, education, and exploration; we are science and stewardship, hiking and discovery; we are many people coming together with a vision to ...

- ***Experience*** the diversity of this land richly steeped in Native American and western heritage, a place like no other in California. Tejon Ranch straddles the Tehachapi Mountains encompassing four ecologies and drawing species unique to each onto one expansive landscape. Tejon is home to more than two dozen plant communities, over 200 species of birds, a third of the state's native oaks and extensive grasslands. Its terrain ranges from snow-capped mountains to dry desert, rolling wildflower covered hills to rugged canyons, home to Joshua tree and conifer forests.
- ***Explore*** new ideas for adapting to climate change, protecting vital habitats, learning sustainable agriculture and much more. The Tejon Ranch Conservancy brings together researchers and conservationists seeking understanding, discovery and answers. We offer school programs, guided hikes, bird-watching, naturalist training and other educational opportunities. Reaching underserved communities is important to the Conservancy to help foster an appreciation of wild places for *all* people.
- ***Protect*** this environmental gem, an extraordinary collaboration among four of the nation's leading conservation organizations – Audubon California, Endangered Habitats League, Natural Resources Defense Council and the Sierra Club came together with the Tejon Ranch Company to create the Tejon Ranch Conservancy, one of the state's largest land trusts working to protect this remarkable place.
- ***Restore*** this vast landscape of rugged mountains, steep canyons, oak-covered hills, broad valleys and expansive grasslands supporting many at-risk species, including the endangered California condor, kit fox and blunt nosed leopard lizard. Restoration focuses in three areas: San Joaquin and Antelope Valley Grasslands, Oak Woodlands and Riparian/Wetlands. Working with research partners and citizen-scientists to protect un-fragmented habitat and wildlife corridors is vital to many species and part of a continent-wide effort.

PLEASE SUPPORT THE WORK OF THE TEJON RANCH CONSERVANCY AS A MEMBER OR PARTNER

[CLICK HERE TO JOIN NOW!](#)

Regular Member--\$50

- ✓ Receives Conservancy publications, a Conservancy cap and sticker.
- ✓ Invites to naturalist-led hikes, citizen science activities, priority registration
- *Student membership-- \$25 (Same benefits as regular membership)

Supporting Member--\$250

- ✓ Receives all above plus invite to an exclusive Conservancy event
- ✓ Priority invite to Conservancy events/activities including special offers
- ✓ California Naturalist or Citizen Scientist Training
- ✓ Donor recognition in publications and web

Stewardship Partner--\$1000

- ✓ Receives all above plus invite to Conservancy Board Dinner
- ✓ Private Ranch tour (four guests)
- ✓ Exclusive Ranch Access Opportunities

Conservation Partner--\$2500 and up

- ✓ Receives all above plus regular updates from President and Board Chair
- ✓ Privileged access to Ranch (by reservation)
- ✓ Researcher Ride Along
- ✓ Program sponsor opportunities
